Climate & Soil :

Temperature : Nipuiah 15-25°C inkarah leh thlasikah 10-11°C inkarah a chin theih a. Boruak hnawn zawng 50-60% a mamawh bawk.

Balu lei leh lei tak inpawl, tui hul zung zung theiah a tha duh a, lei al leh thur zawng pH 6-6.5-ah a tha duh bik.

Micro Environment :

(i) **Light :** Carnation hian darkar 13 chhung eng a mamawh a, pangpar quality tha tak thar chhuak tur chuan carnation hian hnah 4-7 tal a neih a ngai a, chumi tur chuan eng ringawt ni 30 atanga ni 40 chhung a mamawh a ni.

(ii) **Temperature :** Carnation than len nan leh a par chhuah nan hian temperature hian hmun pawimawh tak a luah a. Temperature 15.5°C hi flower bud (a kuhimum) insiam nan a mamawh a. Thlasik laiin zan lam temperature 10-12°C leh nipui laiin 13-15°C (zan temperature) a mamawh bawk.

(iii) **Carbon Dioxide :** CO₂ level Green house chhunga a san hian pangpar quality a tihtat bakah 10-30% lain kan thar hnem phah thei a ni. CO₂ tam zawng hi green house chhungah hian ni sat that hun laiin 750ppm - 1500ppm leh 300-400ppm (chhum zin ni deuhah) a ni

tur a ni. Pangpar quality tha tak CO₂ @ 500 ppm leh temperature 14-15.4°C hnuaiah kan thar thei a ni.

Cultivars :

<u>Standard</u>	<u>Spray</u>
white melody,	Siri-1, Candy,
melody carbasio,	Teresa
Big Red, Etna	

Greenhouse hnuaiah standard varieties tha zual te chu : Ballade, Irma, Candy, Las Palmas, Red Carso, Pink Candy, Pamir, Arthur

Propagation : Seeds, cuttings (soft terminal cuttings)

Cuttings : Cuttings kan lakna kung kha a hrisel tha tur a ni a. Cuttings sei zawng hi standard ah 10-15 cm-a sei leh 7-10 cm-a sei (spray type) a ni tur a ni. October-March inkarah cuttings chu lak tur a ni a. Rooting media atan perlite/sand (balu) a hman theih a. Cuttings phun hmain natna hrik laka ven nan Benomyl-a thithianghlim (sterilize) phawt tur. Cuttings te hian zung kaih nan temperature 15.5°C kar 3 vel an mamawh bakah kar 2 chhung temperature 21°C an mamawh tel bavv.

Planting material : Cuttings 10-15 cm-a sei hnah 4-5 tal nei te chu mist chamber hnuaiah sand bed/cocopeal-ah phun tur a ni. Awlsam zawka zung an kaih theih nan phun hma hian

NAA 250 - 500 ppm-ah chiahin a tha duh bik a ni.

Growing Media : A chinna atan hian lei tha a tam thei ang ber a mamawh bakah, tui luan ral zung zung theihna lei thawl deuh a ngai. Cuttings phun hmain natna hrik laka ven nan methyl bromide, chloropicrin leh formalin hmanga tiethianghlim hmasak tur a ni.

Bed Preparation : Green House chhungah chuan a tlangpuin round bed, dawhkan leh pot-ah te awlsam taka tui luan chhuah theihnaah chin thin a ni. Nursery bed chu 1.2 m (a vang) 15-20 cm (a sang), 35cm-a sei a ni tur a ni, bed leh bed inkar 40cm-a zau tur a ni hawk.

Planting : Green house chhungah chuan engtik hunah pawh a phun theih a. Spray leh standard carnation te chu 15cmx15cm leh 10cm x 15cm-a inhlata phun tur.

Netting/Staking : Carnation hian tha taka a than len theih nan support a mamawh a. Support atan hian net size 7.5 cm x 7.5cm (bottom net) 10cmx10cm leh 12.5cmx12.5cm te hman tur a ni.

Nutrition : Pangpar hrisel leh quality tha thar chhuak tur chuan carnation hian chaw tha a mamawha. Chaw tha tlachhamin emaw chuang-liam lutuka pek hian pangpar quality a tiichhiat bakah duh anga tam thar a har a ni. Nutrient solution al leh thur zawng hi 5.5-6.5 pH inkar leh EC 0.8-1.6mmhos/cm a ni tur a ni.

Growth Regulation : Carnation than lenna kawngah growth regulators hian tam takin nghawng a nei theih a. SADH 40 ppm leh CCC 25ppm hman hian pangpar a par hmatir theih bakah calyx splitting a titlem bawk.

Irrigation : Carnation tiak phun hnu kar thum (3) chhung chu overhead sprinkler irrigation hmanga enkawl tur a ni a, a hnuah drip irriga-

tion (3 tubes/ bed)-a thlak leh mai tur a ni. Tui hman te hi sand filter hmanga filter vek tur a ni.

Management of Plants :

1. *Pinching* : Pinching hi carnation par quality tak thar chhuak tura thil pawimawh tak a ni a. Carnation tiak phun hnu ni 25 atanga ni 30 inkarah pinching hi tih tur a ni. 6th Node-ah pinch tur a ni.

2. *Disbudding* : Disbudding hi terminal bud diameter 1.5 cm a tlin huna tih tur a ni.

Harvesting : Standard carnation te chu tight bud/cross bud/paint bud stage-ah a thar thei a, spray carnation chu pangpar 2 aia tam an parh hunah thar mai tur a ni. Pangpar thar zawn sa te chu tui thienghlim/preservative tuiah chiah vat zel tur a ni.

Yield : 15cmx 15cm spacing hnuiah standard carnation - 200 flowers/ sq.m/yr Spray carnation - 250 flowers/sq.m/yr. a thar chhuak thei a ni.

Post Harvest Handling :

- i) Refrigeration 10-20°C-ah harvest zawn ve leh dah tur.
- ii) Floral preservative hmangin
- iii) Tui thienghlim hmangin
- iv) Thawn chhuahnaah temperature management a pawimawh.

Carnation hi ethylene gas lakah a sensitive em em a. Pangpar te chu kan pack hmain sucrose. AgNO₃ leh HQC leh Silver Throsulphate hmanga treat phawt tur a ni. Temperature 8°C leh R.H 90% hnuiah ni 40 atanga 50 thleng a dah that theih a ni.

Packing : Standard size corrugated cardboard boxes (122cm x50cmx30cm LxBxH)-ah bawr 32 vel a pack theih a ni.

GERBERA

Gerbera (*Gerbera jamesonii*) hi a ɋobul chu South Africa a ni a. Tunah chuan he pangpar mawi leh mi hipna ngah tak mai hi khawvel hmun hrang hrangah sik leh sa chi hrang hrang hnuiah chin mek a ni.

Sik leh sa (Climate) : Khawlurh leh vawtah a chin theih deuh vek a. Boruak 12-25°C inkar hi a than len nan a mamawh a. Boruak a lum lutuk chuan pangpar quality a tichhe thei a ni.

Leilung ngeih zawng (Soil) : Leilung thawl leh lei dur thaah tui luan ral zung zung theihna, lei thur leh al tehna 5.0-7.0 pH inkarak a Ɋha duh bik.

Micro Environment :

(1) *Temperature* : Chhun temperature 27°C aia sang lo leh zan lam 18°C aia hniam loah a tha duh. Phun zawh hnu thla khat chhung chu zan lam temperature 12-15°C inkar leh 10°C aia hniam lovah enkawl tur a ni.

(2) *Light* : Gerbera hian ni eng 70% thlasik laiin a mamawh a, nipui lain 50% shade (hlim) a mamawh hawk.

(3) *Humidity* : Boruak hnawng 55-65% a maniawh a, Green house chhungah chuan humidity hian gerbera tha taka a than len leh par chhuah nan nghawng thui tak a nei a ni.

Varieties : Varieties pawimawh zualte -

Pink : Valentine, Fredaisy, Terraqueen

Red : Vesta, Dusty, Fredorella

Yellow : Fredekine, Uranus, Nadja.

Propagation (A chin pun dan) : A chi hmangin emaw anih loh pawn division of clump, cuttings, tissue culture etc. Atlangpuiin cuttings hmanga chin pun a ni.

Plaining Materials : Gerbera Ɋak hnah 3-4 nei tawh chin a hman theih.

Growing Media : A chinna tur lei chu 50cm-a thuka laih a, phut darha siam tur chuan bawng ek leh Ɋha, hnahthei Ɋawih, cocopeat etc. te nena chawhpawl tur a ni.

Nursery bed size : 30 m-a sei, 25-30 cm-a sang, 1-1.5 m a vang leh 30-40 cm-a inhlata siam tur a ni.

Soil sterilization : Gerbera Ɋak phun hmain, a phunna lei kha hriak ilo laka then thianghlim phawt tur a ni a. Hemi atan hian formaldehyde methyl bromide (100g/sq.m), Vaparn, Chloropicrin leh Basamid te a hman theih a ni. Chemical leh lei hi chawhpawl hnuah polethyne-a khuhin ni 7 chhung dah a ngai a, ni 7-10 hnuah chauh gerbera Ɋak te chu phun tur a ni.

Bed Preparation : Nursery bed 30 cm-a sang, 1-1.2m a vang leh 30 cm bed leh bed inkarak dah awlin, bawng ek leh Ɋha, balu leh coconut coirpith (2:1:1 ratio) hmanga bed siam tur a ni.

Planting : Gerbera hi kumtluanin a phun theih a, August thlaa phun hian nipui leh thlasik laiin duh tawkin a thar theih laiin June thlaa phun a tiak tha duhin a hnah pawh a tam deuh bik.

Nutrition : Lei tha leh fertilizers thlaa a mamawh zat chiah enfiah hmasaka pek tur a ni. Tui pek rualin awlsam takin lei thate chu pek mai tur a ni.

Standard feeding solution :

Tank A	Tank B
(i) Calcium nitrate - 0.2 Kg	(i) Potassium nitrate (3.2 kg)
(ii) Magnesium sulfate - 1.4 kg	(ii) Calcium nitrate (2.8kg)
(iii) Potosh of sulfate - 1.4 Kg	
(iv) Mono Potassium phosphate - 1.4 kg	

Solution al leh thur zawng khi pH 5 - 6.5 inkar a ni tur a ni a, chuan E.C 0.5-2.0 ms/cm a ni bawk tur a ni.

Irrigation : Tui kan pek tam zat leh tui quality-in nghawng lian lak a nei thei a. Green house chhungah chuan sprinkler irrigation system hmangin awlsam takin a pek mai theih. Nipui laiin tui a tam thei ang ber pek a tul a, fur lai erawh chuan pek tam a ngai lo.

Harvesting : A par chanve vel phar hunah leh a par phar kim hnuah te seng mai tur a ni.

Yield : Gerbera thar theih zat hi a inang lo va, varieties leh greenhouse chhunga enkawl dan azirin a tlangpuiin par 180 - 250 vel 1 sqm atangin kum tin a thar theih a ni.

Hnathawk nasate chu dan naranin an rinawm a; a chhan chu taimaknain thlemlna chungah a lentir vangin.

XII INTERNATIONAL CITRUS CONGRESS VALENCIA - SPAIN ZIN REPORT

By Samuel Rosanglura, Director of Horticulture
Vanlalruata Chenkual, Dy. Director of Horticulture

International Citrus Congress hi khawvel pum huapa Citrus (Ser) tihhmasawnna tura thawktu - Scientist, Government Agencies, Ser chingtu, Serlema sumdawngte inhmuhkhawma Citrus (Ser) tihhmasawnna tura an hriatna leh harsatna te sawihoa hmasawnna khawvel pum huapa buaipui tura inkhawmpui a ni. Kum 4 (four) danah a awm thin a. Kum 2008 khan China ramah an hmang a, tunah chuan Valencia-Spain ramah 18th - 23rd November 2012 nghah a ni. Tin 12th-18th November 2012 hian Pre-congress tour an buatsaih bawk a.

He XII International Citrus Congress ropui takah hian Pu Samuel Rosanglura, Director of Horticulture, Govt. of Mizoram hnung zuin kei Vanlalruata Chenkual, Dy. Director of Horticulture, hi kan Director of horticulture duhsakna lawmawm tak mai changin ka kal ve a. XII International Citrus Congress tan hma hian vanneihthlak takin Pre-congress tour 12th - 18th Nov 2012 chhungin khawvela hmun hrang hranga Ser chingtute nen Spain rama Citrus an chinna Valencia, Murcia, Almeria, Cordoba, Huelva, Sevilla-Provinces-a Serhuan ropui tak tak kan fang a.

Tun tumah chuan a thui dawn avangin Pre-congress tour chauh kan report mai ang. A hmasain Spain rama Citrus (Ser) an chin dan i lo sawi thuak thuak ang. Spain rama Citrus (Serthlum) chin chhoh dan hi thawnthu sei tak a awm a. Kum zabi 5-ah khan Romans hoin an ching tan a. Arab hoin kum zabi 10th-11th chhung a awp lai khan "Sertur" (Sour Orange), Lemon leh Pummelo te an ching belh leh a. Kum zabi 19th-ah chuan mandarins leh grapefruits te U.S.A atangin an la lut bawk a. Ser (Citrus) hi a tir lamah chuan damdawi leh ornamental plant atan an hmang ber a. Kum zabi 18th atang khan sumdawnnna atan ser rah te hi Europe ram hrang hrangah an thawn chhuak tan ta a ni.

Ser (Citrus) chin hi awlsam tak chu a ni bik hauh lo a. Kum zabi 19th-ah khan "Sertam" an tuar ve tan a, Ser kung tam tak a thi a. Heng zingah hian Sour Orange rootstock-a hmang te chuu an him bik a. A chhan chu Sour Orange hian ser natna Phytophthora root rot lakah a him bik vang a lo ni a. Tichuan Sour Orange rootstock-a hmangin an ser huan an thar thawh leh a. Mahse hei pawh hi engkim channa chu a lo ni leh chuang lo va. Natna dang Citrus tristeza virus (CTV) lo lang lehin ser kung 44,00,000 a thih phah a ni.

Heng natna (Sertam) avang hian ram pumin harsatna leh channa rapthlak tak lo thleng thin hi ser tiak hrisel lo leh natna kai sa phun thin vang a ni tih hriain, Ser tiak siam chhuahna Nursery te sawrkarin nghet taka control-in Nursery act leh plant quarantine 1983-ah an siam ta a. Nursery neitute chuan ser tiak hrisel leh natna kai lo phun tur thar chhuakin, tunah hian 14,000,000 ser an phun thar leh ta a. Tin Drip irrigation hmangin ram ro leh chhengchhe deuh te pawh ser huan atan a siam thar zel a, ruahui 800mm vel chauh an dawn chu hmang tangkaiin Geomembrane 1000-1500 micron in tuidakhawlna (reservoir) lian pui pui an siam bawk a.

Tunah hian Spain chuan 330,000 Ha.-ah ser an ching a. Kum khat chhungin 6,500,000 tons an thar thin a. Heng zingah hian sweet orange=48% mandarin=35% leh lemons=16% te a ni a. Spain hi Europe ram zingah ser rah export hmasa ber a ni a. Ser rah thar 50% aia tam mah hi an export (thawnchhuak) a, 20% vel hi ram chhungah a hrall ve a. 18% vel hi an processed thin a. 12% vel hrall tlak loha ngaih a ni. Ser hi Mediterranean tuipui kam chheh vel - Tarragona, Castellon, Valencia, Murcia, Almoria, Maloga, Guadalquivir valley-Cordoba, Sevilla leh Atalntic tuipui kam-Huelva-ah te an ching nasa. Ser (Citrus) hi an ram thlai pawimawh ber a nih angin, sawrkar pawhin a ngai pawimawhin hma nasa takin a lain, scientist rualin an ser variety te tichangtlungin ser variety hrang hrang hrisel leh thar hlawk leh hmin hun inang lo siam chhuakin, kumtluan a ser rah thar lam thar chhuak reng thei turin an kalpui mup mup a, hemi kawngah hian nasa takin hma an sawn tawh a ni.

Pre-Congress tour chhung hian Spain rama serhuan ropui tak tak ni sarih (7 days) chhung kan fang a. Scientist, Tour Guide leh huan neitu ten hawihhawm takin min lo dawngsawng a. An ser huan a zau em em hlawmin mit tlin tawk a ni mai e. A ram pumpui a hmun rem chinah chuan ser huanin a khat a ni ber mai e. A tlangpuuin an ser te chu leihuipawn (ridge)-in thlur fel takin an siam a, leihuipawnah serthlum an phun a. Drip irrigation-in tui leh chlai chaw (nutrient/ fertilizer) pek a ni a, ruahui an dawn ang ang (800mm/ annual) te tha takin Geomembrane 1000-1500 micron hmangin reservoir lian puipui an siam a. Heng an tui dahkhawl hian an ser huan te an chawm thin a ni. Ser huanah hian ser variety hrang leh a thar/hmin hun hrang hrang an ching a, kum tluuin ser rah ser tur nei turin an inbuatsaih a. Tin an ser rah te chu a kawr a chhah a, a chhung chu sertui tam tak nei a ni a. A ser kawr chhah hi a phurh (transportation)-ah a chhe ve mai mai lo a, a remchang hle a ni. Tin, Ser huan siamtute chu mi hausa tak tak a ni a, sawrkar atangin tanpuina an beisei hran lo va, an bul tanna tur sum leh pai chu bank atangin loan-in an la mai thin.

Tin, ser huan siam turin ser phun tur tha hriatchiah Nursery atang lo chuan a leiin an phum ngai lo. Kan ser huan tlawh hrang hrangte han tarlang ila :-

Sl. No.	Serhuau Hming	Area Ha.	Ser Variety Hming	Location	Yield
1	El Canarico	165 Ha.	Finno Lemon Nadarcott	Alhama de Murcia	50-60 ton/Ha.
2	Almendricos	200 Ha.	Navelate orange Powell orange Nadarcott Mandarin Chislett orange Clemenrubi Iwasaki mandarin	Lorca, Murcia	
3	El Turbinto	150 Ha.	Chislett orange Fino49 lemon Nova mandarin Lane Late orange Clemenrubi Iwasaki mandarin Murcott mandarin	Pulpí, Almaría	45-70 ton/Ha.
4	Citroplant Nursery	25 Ha.	Iwasaki Clemenrubi Nadarcott Murcott Fukumoto Powell Chislet	Pulpí, ALmaría	500,000 Nos of plants
5	El Taraje	185 Ha.	Clemenrubi Clemenules Clemenmapo Nova Ortanique	Cantillana, Sevilla	40-59 ton/Ha.
6	Majaloba	8 Ha.	Sour Orange	La Rinconada, Sevilla	50 ton/ Ha.
7	La Dehesilla	1200 Ha.	Valencia Late Lane Late Sanguina Salustiana Sucrena Fukumoto	Villanueva de los Castillejos, Huelva	10,000 ton/Ha.
8	La Calvilla	221 Ha.	Owari Satsuma Navelina Powell Orange Nova Orri Nadarcott	Gibraleon, Huelva	7500-10,000 ton/Ha.
9	Manzorrales	262 Ha.	Clemenrubi Nova Nadarcott mandarin Barberina Barnfield Powell Midnight	Gibraleon, Huelva	9000-12000 ton/Ha.

XII International Citrus Congress, Valencia, Spain ram kan hman leh Pre-Congress tour-a kan thil hmuh atangin Mizoram tana sengluh awm thenkhatte :

1. Serhuan siam tur ten Ser phun tur hrisel tha leh hriatchian phun. Hemi kawngah hian Horticulture Department-in Nursery neite a register-in a khuahkhirh (control) dan chhunzawm zel.
2. Khawvel hmun danga Ser variety tha, hun bi hrang hranga rah thei, lak luha kum tluana Ser (Citrus) rah nei tura hma lak.
3. Kum tina kan ruahui tam tak kan neih hi hman tangkai. A dawn khawmna (reservoir) Geomembrane hmanga siamin, kan tui dawn khawmte chu thal lai (Jan-April)-in Drip Irrigation hmanga Ser kung tui pek.
4. Kan rama huan siam nan a leilung leh tui thatna hmun te hi hman tangkai theih turin kawngpui tha leh Electric power-a thuam nise, tah chuan awmze nei leh selfai taka hma lak a chawkawm hle mai.
5. Ser huan siam hi sumdawnna tha leh hlawk tak a ni tih hriain, kan ram mi hausa leh sumdawngte pawh hian he mi kawngah hian an ngaihtuahna han pe thar se. Anmahni hlawkna bakah mi tam tak eizawnna/hna a siamsak thei bawk ang.
6. Kan Ser (serthlum) chin lai hi a hawng a pan avangin a phurh velna lamah a chhia a tam thei hlein kan ram a kilkhawr bawk si a. Ser (serthlum) hawng chhah, a chhung lam tha leh tui tam si, phurh velna lamah pawh chhe har tur phun uar ni se.
7. Tuna Mizoram Horticulture Department-in hmanrua leh Technology a chhawp chhuah te hi khawvel hmun hrang hrangah changkang zawk ena kan en te pawh hian hei bak hi chu an neiin an hmang chuang lo a. A nih dan tur ang takin hmang tangkai tum ila.

Miin a dik lohna a pawm ngamin a zak tur a ni lo; a chhan chu chutianga a tih ngam chuan nimin aiin vawiinah a fing ta zawk a ni tih a hriat phah a ni.
